

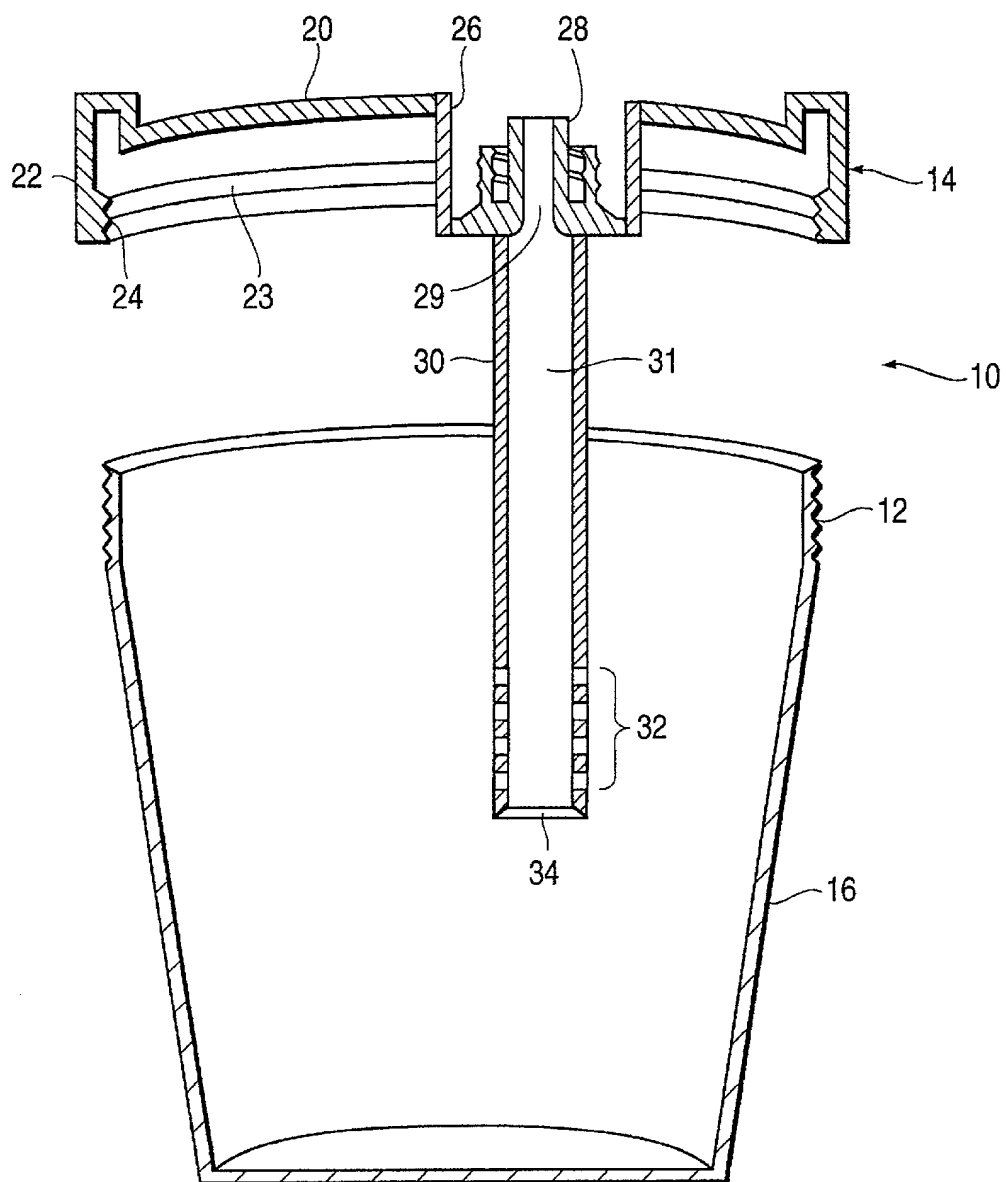

FIG. 1

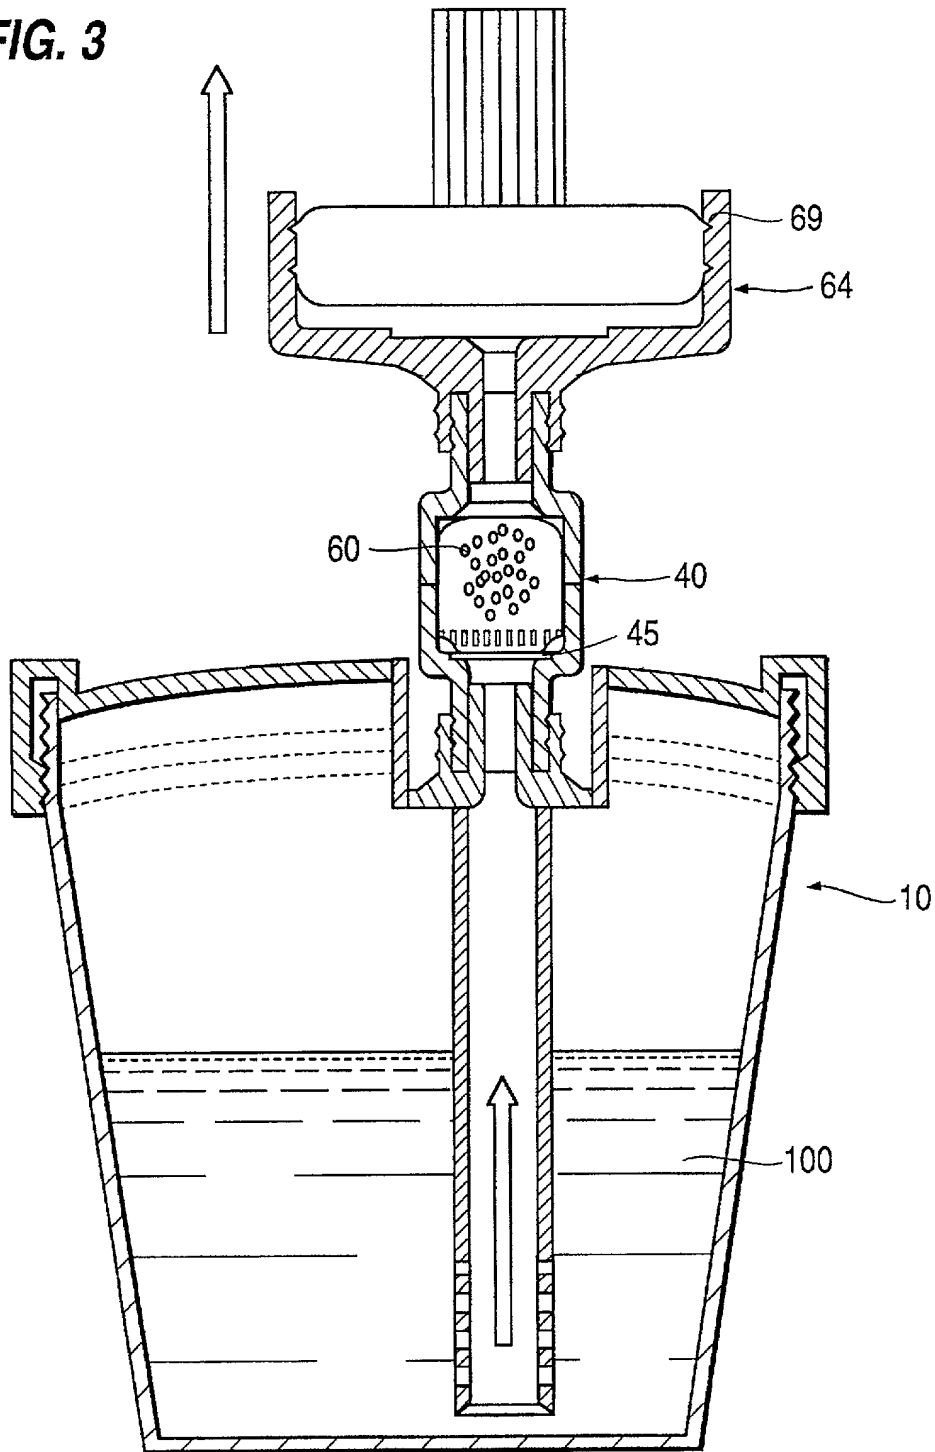

FIG. 3

FIG. 4

FIG. 4 is a cross-sectional view of a device 10. The device includes a reservoir 100 at the bottom, which contains a fluid. A central tube extends upwards from the reservoir, passing through a valve assembly 40. The valve assembly 40 contains a filter 60. Above the valve assembly is a chamber 64, which also contains a collection of particles 60. An upward arrow indicates the direction of fluid flow from the reservoir, through the tube and valve, into the upper chamber.
